ROUTING

COMPOSE, MANAGE & ROLL-OUT SIMPLE EFORMS

with our flexible, hosted **LincDoc FreeForm**. We designed FreeForm for those organizations with a lighter commitment to forms processes that need to streamline data collection, ensure its integrity and mitigate manual processing errors.

Managed by LincWare, FreeForm converts an existing document (Word or PDF) into a Web or Intranet accessible eForm that after completion by an end-user, seamlessly merges with a current Laserfiche environment while simultaneously presenting a final version to the external end user. Completed eForms can also be internally routed in PDF or TIFF formats. FreeForm also integrates online payment and digital signature acceptance.

As a hosted solution, form participants interact with only an easy-to-complete, breeze-through electronic form. Thus, LincWare customers receive all the benefits of an eForms solution but remain un-impacted by the administration of new software. Plus, FreeForm is an affordable addition to, or great way to start, your organization's "greening" strategy.

## LincDoc FreeForm offers your organization:

- A hosted solution for generating simple but powerful eForms
- The ability to be up and running quickly with no capital investment and little IT support
- An easy way to begin paper to eform transition process
- Rapid "proof of concept" and demonstrable ROI with only one eForm
- Significantly reduced costs relative to paper usage, printing and manual document processing
- The chance for all employees and customers to use the same form for its respective business function

- An improved appearance to customers as an efficient, tech-savvy organization
- An outstanding opportunity to further company green initiatives
- 100% latest version accuracy for all eForms to eliminate outdated content, confusing duplicates and establish presentation consistency
- An opportunity to significantly leverage technology while dedicating little internal resources
- 24/7 technical support with expansive product Wiki access and enhanced feedback opportunities

FreeForm is an eForms solution that allows customers to present intuitive eForms to Web users without the burden of on-premise oversight or capital investment.

ROUTING

PROCESS

eForm participants on the Web are guided through an **intelligent, controlled input experience** that's completed in moments.

They can also pay online and legally sign important documents.

Internally, completed participant forms are dropped into Laserfiche and then efficiently routed; and, **LincDoc can seamlessly integrate with your existing databases.**
